and takes care of the clean air.*

Renia GmbH · P.O.Box 910659 · D-51076 Cologne · Tel. +49-221-63 07 990 · Fax +49-221-63 07 99 50

AQUILIM 315

THE WATERBASED ADHESIVE

*Dries clear,
stays flexible,
no chemical fumes,
no allergic reactions.*

INSTRUCTIONS:

All materials common in the O & P market as leather, rubber, EVA, Crepe, Cork, PUR, Textiles and others can be bonded. Will also work on PP, PE and Metal.

PREPARATION:

All materials need to be cleaned and sanded first. Apply RENIA AQUILIM 315 on both sides. If you bond together porous and dense materials apply RENIA AQUILIM 315 only to dense material. Oily surfaces should be cleaned with actone or thinner.

OPEN TIME:

30 to 60 minutes. When heated, as quick as regular adhesives. RENIA AQUILIM 315 is ready for bonding when the layer becomes clear.

THINNING:

Normal tap water is all that is needed to thin Aquilim.

STORAGE:

Minimum 12 months at room temperature. Never allow freezing to occur, as it will destroy the adhesive.

SIZES:

RENIA AQUILIM 315 is available in 0,5 kg (about 1 Pint) and 3 kg (about 3 quarts) containers.

Aquilim 315 water based adhesive

Available	Item No.	size	Amount ordered
	450250	0,5 kg (US: 1 Pint)
